

QUALITY IS OUR DRIVING FORCE ®

RESPONSIBLE CARE®
OUR COMMITMENT TO SUSTAINABILITY

Slay Transportation Co., Inc. Security Policy February, 2016

Slay Transportation Co., Inc. is committed to the security of personnel, equipment, company property, and the safe, secure transportation of product for our customers.

Slay Transportation's Leadership Team strongly supports and encourages all employees and drivers to follow security measures as put forth in our company Security Plan as well as security regulations established by government agencies such as the Department of Homeland Security, the Department of Transportation, and the American Chemistry Council's Responsible Care® Security Code of Management Practices.

Slay Transportation's security goal is to operate our company incident free. It is the expectation of the Slay Leadership Team that all employees and drivers will fully support this policy and employ security measures and security awareness training practices that will demonstrate the effectiveness of our security policy and program.

Slay Transportation has terminal and office facilities in many locations and uses the roadways of our nation to complete our business. The Leadership Team realizes that we must be committed to the continual security of ourselves, our company, our customer facilities, the communities where we conduct our business, and the transportation system as a whole. We strongly encourage all employees and drivers to employ security awareness measures as described in our company Security Plan.

Slay Transportation will operate within the legal and regulatory framework established for the transportation industry, as well as comply with the Responsible Care® related requirements to which we voluntarily ascribe.

This Security Policy is endorsed and supported by the Slay Transportation Leadership Team.
